

TC1 PROPAGATION SUBSTRATE

FINE SCREENING

APPLICATION

White peat based universal substrate with a fine structure for sowing, cuttings and transplanting into pots and bowls.

Transplants

Speedies

2-7 cm

PHYSICAL CHARACTERISTICS

Composition: 100% Sphagnum White Peat
Structure: 0-10 mm

*Wetting Agent - improved water absorption

CUSTOMIZING OPTIONS

White Peat - Black Peat Compositions:

- 80:20

Structure:

- Extra fine 0-5 mm

CHEMICAL CHARACTERISTICS

NPK 14-16-18 + Microelements*	0.8 kg/m ³
Nitrogen	110 mg/l
Phosphate	130 mg/l
Potassium	140 mg/l

* Magnesium, Boron, Molybdenum, Copper, Iron as Iron-Chelate, Manganese, Zinc
Fluctuations in the chemical properties are within the permissible tolerancerange.

EC < 1 mS/cm

pH (CaCl₂) 5.0-6.0

DELIVERY OPTIONS

70L, 250L, 340L, Big Bale

Availability of package size depend on the constitution (e.g. weight) of the substrate mix.
